RICHARD C. SALKIE, P.E.
ASSOCIATE DIRECTOR

Mr. D.H. Beck, Environmental Specialist
Chevron USA, Inc.
1200 State Street
Perth Amboy, NJ 08861

Dear Mr. Beck:

In response to your letter of October 25, 1985 for a Departmental opinion on the classification of a dock canopy, please be advised that wastes which conform with the representative sample that provided the basis for data submitted to the Department are classified as bulky waste (I.D. #13) pursuant to the rules of the Division of Waste Management. Wastes conforming with the characteristics of the representative samples must be disposed at the facility authorized to accept bulky waste (I.D. #13) in accordance with the state waste flow rules as contained in N.J.A.C. 7:26-6 et seq.

Be further advised that this letter constitutes merely an advisory opinion on the applicability of current New Jersey waste classification standards to a specific representative sample of a waste stream. It expresses no opinion regarding any particular waste shipment to the extent that its characteristics and content differ from the representative sample of a waste stream.

Moreover, because the Department has not examined, inspected or analyzed the wastes you propose to dispose, as represented in your letter of October 25, 1985, this response does not constitute any representation as to the actual chemical composition of said material.

Accordingly, prior to disposal of this waste, you may wish to contact the selected disposal facility to establish an analytical protocol which will satisfy all concerned parties that current regulations allow for such disposal.

Should you have any further questions regarding this matter,
please contact Mr. David Schrier of this Bureau at (609) 292-8341.

Very truly yours,

Lunt Whitford for

Shirlee Schiffman, Chief
Bureau of Hazardous Waste
Planning and Classification
